Name of HOD/ Supervisor With e-mail id				
Main points of the day				

Day 1 – Internship Orientation & HTML Introduction

On the first day of my internship, I was introduced to the project structure, objectives, and expected outcomes. I understood the roadmap of becoming a full-stack developer through practical implementation. I began learning HTML basics including document structure, tags, and page layout. I created my first simple webpage using headings and paragraphs. This day helped me understand how websites are structured at the foundational level.

Main points of the day				

Day 2 – HTML Elements & Page Structuring

Today I explored various HTML elements such as lists, links, images, and formatting tags. I practiced creating structured webpages with proper alignment and content organization. I also learned about semantic tags and their importance in modern web development. I built a small static webpage integrating different elements. This improved my understanding of frontend structure design.

DAY-1		DATE		
Time of arrival		Time of Departure		Remarks
Deptt./Division		Name of finished Product		
Name of HOD/ Supervisor With e-mail id				
Main points of the day				

Day 3 – HTML Forms & User Input

I learned how to create forms using input fields, labels, buttons, and dropdown menus. I understood how user data is collected through form submissions. I implemented a basic login and registration form layout. This day enhanced my knowledge of interactive webpage components. It also prepared me for backend integration in upcoming sessions.

Main points of the day				

Day 4 – CSS Basics & Styling

Today I was introduced to CSS and its role in styling web pages. I learned about selectors, colors, fonts, and background properties. I applied CSS to previously created HTML pages to improve their appearance. I understood the difference between inline, internal, and external CSS. This helped me realize the importance of presentation in user experience.

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-1		DATE		
Time of arrival		Time of Departure		Remarks
Deptt./Division		Name of finished Product		
Name of HOD/ Supervisor With e-mail id				
Main points of the day				

Day 5 – CSS Box Model & Layout Design

I learned about the CSS box model including margin, padding, border, and content. I practiced adjusting layouts and spacing to make pages visually appealing. I worked on aligning elements properly using display properties. This helped me understand webpage responsiveness. I gained confidence in designing clean and structured layouts.

DAY-1		DATE		
Time of arrival		Time of Departure		Remarks
Deptt./Division		Name of finished Product		
Name of HOD/ Supervisor With e-mail id				
Main points of the day				

Day 6 – Introduction to Python Programming

Today I started learning Python programming language. I installed the required development environment and understood Python syntax. I practiced working with variables, data types, and basic input/output operations. I executed small programs to strengthen my basics. This marked my transition from frontend to backend learning.

Signature of Industry Supervisor

DAY-1		DATE		
Time of arrival		Time of Departure		Remarks
Deptt./Division		Name of finished Product		
Name of HOD/ Supervisor With e-mail id				
Main points of the day				

Day 7 – Conditional Statements in Python

I explored decision-making statements such as if, elif, and else. I wrote programs that performed logical operations based on conditions. I practiced solving real-life problems using conditional structures. This enhanced my logical thinking skills. I understood how backend systems process decision-based workflows.

Signature of Industry Supervisor

DAY-1		DATE		
Time of arrival		Time of Departure		Remarks
Deptt./Division		Name of finished Product		
Name of HOD/ Supervisor With e-mail id				
Main points of the day				

Day 11 – Introduction to APIs & HTTP Methods

I learned the concept of APIs and how applications communicate over the internet. I understood HTTP methods like GET, POST, PUT, and DELETE. I explored how data is transferred between client and server. This gave me clarity on real-world web interactions. It laid the foundation for backend communication.

Signature of Industry Supervisor
